about current program offerings**

Our Adaptive Aquatics programs are specifically designed for individuals with disabilities. They are led by WSI certified (Water Safety Instructors) that have experience with children with a variety of differing abilities. Our program starts with families completing a [Swim Abilities Form](#) which must be returned at least one week prior to the start of the program. This form allows us to understand your swimmer's abilities and their goals and helps us develop a plan to best fit their unique needs. If requested, an on-site orientation or swim evaluation can be arranged before the start of lessons to allow your child to get to know our instructors, become familiar with our facility or for us to evaluate swim experience.

Reach out to us today so we can work together to customize your swimmer's experience!
